

TACH-10 and TACH20 Combo Tachometers

Measure rotational speed of motors, conveyor belts and other moving or rotating systems with these handheld tachometers. The TACH20, our top-of-the-line tachometer includes six adapters, a surface speed wheel for contact RPM measurement and an infrared beam for non-contact measurements. The TACH-10 is an economical, universal tachometer that measures rotational and surface speed using both contact and non-contact methods.

- Built-in memory function automatically stores maximum, minimum and average values as well as the last measurement displayed
- Easy to select units and mode functions
- Select RPM using infrared beam or adapter: m/min, m/sec, ft/min, ft/sec, in/min, m, ft and in
- Auto power-off function

LM-100

TOP RATED
"Excellent meter for lighting uses."

"I've found this meter's accuracy is as advertised at +/- 3%, its consistency under flickering AC driven LEDs (120Hz) is actually better than higher end meters that are unable to compute the samples accurately. Overall, an impressive meter at a great price, that I use for rough photometric tests as well as general illumination measurements."
