More information

Ordering information

Explanation of the tables with selection and ordering data:

"Device type" and "Order No. of the associated standard device"

- "Type specification" and "Order No." of the HMI product to be modified.
- Start of delivery of a design version cannot commence less than 2 months after the start of delivery of a standard device.

"Design version"

- Type of modification required, according to design versions

"Minimum quantity"

- In order to be able to offer high-quality products at a competitive price in the global market, there must be a lower limit to the annual quantity and a minimum order quantity.
- A clear presentation of all possible design devices with the associated minimum quantities can be found in the overview tables.

Prices and one-off costs

An additional amount over the price of the standard device is charged for the customized design device.

There are no additional costs for a one-off design (without Change Requests).

Processing

A special order processing is required for the customized design. Various approval steps by the customers are to ensure that the end product fully meets their expectations. The order is processed via the Delivery Center Nuremberg (LZN). Orders and deliveries of 1 unit or more depending on the version or contract are possible!

Repairs/spare parts storage

Only identified repairs are carried out.

The customer-specific spare parts required for this purpose (device front panels) are to be stored and made available by the customer on expiry of the warranty period or on termination of supply.

Contacts

Please contact your local/national Siemens HMI representative (visit our Internet site for more information).
