

SIDEMO Didactical Accessories

Combined Cable for (Almost) All Drives

SIEMENS

Combined cable for the firmware boot function and DriveMonitor (RS232). Pre-fabricated signal cable with a boot switch for firmware booting integrated in the cable plug enclosure. In addition, the cable can be employed for visualization with DriveMonitor.

Only this cable is required for commissioning, diagnostics and communication via RS232

Order number:

9AK1012-1AA00
