

Hazardous Location Fittings

Provides maximum volume for bends within a compact overall size!

Capped Iron Elbow — Female to Female

Application

LBY/GYF elbows are installed in conduit systems within hazardous areas to:

- Make 90° bends in conduit systems where space is limited
- Act as pull outlets
- Provide access to conductors for maintenance and future system changes

Features

- Maximum volume for bends within a compact overall size
- Screw on cover for ease of installation and removal
- Cover opening on an angle, permitting conductors to be pulled straight through either hub
- Tapered threaded hubs and integral bushing for rigid threaded conduit

Standard Materials

LBY Ductile Iron

GYF Copper Free Aluminum
